DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 2. Claims 1-20 are rejected under 35 U.S.C. 102(a) as being unpatentable over "<u>Virtual</u> reality trading floor adds new dimension", Computerworld. Framingham: March 29, 1999. Vol.33, Iss 13; pg 67. Hereinafter <u>Computerworld</u>.

<u>Computerworld</u> teaches a system and method for displaying data representing the operation of an exchange, comprising:

- maintaining data representing a three dimensional model of said exchange trading area, said model including surfaces (pages 1-2);
- receiving and maintaining in a computer memory data representing exchange operations; generating a two dimensional display representing a selected aspect view of said three dimensional model, said two dimensional display including perspective views of at least some of said surfaces of said model (pages 1-3; photograph "The 3-D TRADING FLOOR captures realtime data from nine systems as well as video feeds to monitor trading activity").
- generating alphanumeric images of selected data representing exchange operations; and mapping said alphanumeric images onto selected ones of said perspective views (3DTF). wherein there is provided the further steps of: changing said selected aspect view of said three dimensional model (pages 1-2);
- generating a further two dimensional display representing said changed aspect view, said further two dimensional display including further perspective views of at least some of said surfaces of said model; and mapping said alphanumeric images onto selected ones of said further perspective views in said further two-dimensional display. (pages 1-4; "The 3-D TRADING

FLOOR captures realtime data from nine systems as well as video feeds to monitor trading activity")

- wherein portions of said two dimensional display are selectable, said selectable display portions being operable when selected for displaying further data correlated to said selectable display portions (pages 1-2).
- wherein at least some of said selectable display portions comprise said perspective aspect views, and wherein said further data is correlated to data represented by said alphanumeric images mapped onto said perspective aspect views (3DTF).
- maintaining data representing a three-dimensional model of said exchange trading area, said model including model portions representing said trading posts; receiving and maintaining in a computer memory data representing trading of said securities; and generating a two dimensional display representing a selected aspect view of said three dimensional model, said selected aspect view including one or more of said model portions representing said trading posts, said model portions having selectable parts being selectable and operative when selected to display further data from said computer memory correlated to said selected parts (pages 1-3).
- wherein said model portions representing said trading posts include surfaces and wherein said step of generating a two-dimensional display further comprises generating alphanumeric images relating to securities traded at a selected trading post and mapping said alphanumeric images into selected ones of said surfaces in said two-dimensional display; and wherein said surfaces being operative when selected to display further data correlated to said related securities (pages 1-3; photograph "The 3-D TRADING FLOOR captures realtime data from nine systems as well as video feeds to monitor trading activity").
- 3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Pwu whose telephone number is 703 308-7835. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyun
